WARNING

- Misuse of this product may result in serious injury.
- Read user's manual and follow all warnings and operating instructions prior to use.
- Do not allow children on or around machine.
- Replace label if damaged, illegible, or removed.
- Keep hands, feet and hairs away from moving parts.

Ce produit, qui est conforme aux normes EN 957 classe HC, GB17498, n'est pas destiné à un usage thérapeutique.

Este producto, que es conforme a las normas EN 957 clase HC, GB17498, no se debe utilizar a fines terapéuticos.

Dieses Produkt entspricht den Normen EN 957 Klasse HC, GB17498. Es ist nicht für eine therapeutische Benutzung geeignet.

Il presente articolo, conforme alle norme EN 957 classe HC, GB17498, non è destinato ad un uso terapeutico.

Dit product, dat voldoet aan de normen EN 957 klasse HC, GB17498, is niet bestemd voor therapeutisch gebruik.

Este produto, que está em conformidade com as normas EN 957 classe HC, GB17498, não se destina a uma utilização terapêutica.

Produkt zgodny z EN 957 klasa HC, GB17498, nie nadaje się do celów terapeutycznych.

Ez a készülék megfelel az otthon és nem kezelés keretében használt Fitness termékekre vonatkozó európai és kínai szabványoknak (EN-957-1 és 5 HC osztály / GB17498).

Данный прибор соответствует европейским, американским и китайским стандартам на изделия для фитнеса для домашнего не лечебного использования (EN-957-1 и 5 класс HC / GB17498).

Η παρούσα συσκευή συμμορφώνεται προς τα Ευρωπαϊκά και Κινέζικα πρότυπα που σχετίζονται με τα προϊόντα μη θεραπευτικής άσκησης στο σπίτι (EN-957-1 και 5ης κατηγορίας HC / GB17498).

Acest produs care este conform normelor EN957, clasa HC, GB17498, nu este destinat utilizării terapeutice.

Tento výrobok spĺňajúci požiadavky noriem INTO 957 triedy HC, GB 17498, nie je určený na terapeutické použitie.

Tento výrobek, který je ve shodě s normami EN 957, třídy HC, GB17498, není určen pro léčebné účely.

本产品符合欧洲标准 EN 957 的 HC 等级、等级以及 GB17498 标准。不适合作为治疗用途产品使用。

AVERTISSEMENT

- Tout usage impropre de ce produit risque de provoquer des blessures graves.
- Avant toute utilisation, veuillez lire attentivement le mode d'emploi et respecter l'ensemble des avertissements et instructions qu'il contient.
- Ne pas permettre aux enfants d'utiliser cette machine et les tenir éloignés de cette dernière.
- Si l'autocollant est endommagé, illisible ou manquant, il convient de le remplacer.
- Ne pas approcher vos mains, pieds et cheveux de toutes les pièces en mouvement.

ADVERTENCIA

- Cualquier uso impropio de este producto puede provocar heridas graves.
- Antes de cualquier utilización, lea atentamente el modo de empleo y respetar todas las advertencias e instrucciones que contiene.
- No permitir a los niños utilizar esta máquina y mantenerlos alejados de la misma.
- Si faltase la pegatina, o si la misma estuviera dañada o ilegible, conviene sustituirla.
- No acercarse sus manos, pies y cabello de todas las piezas en movimiento.

WARNHINWEIS

- Jede unsachgemäße Benutzung dieses Produktes kann schwere Verletzungen zur Folge haben.
- Vor jedem Gebrauch bitte diese Gebrauchsanweisung aufmerksam lesen und alle darin enthaltenen Warnhinweise und Anweisungen befolgen.
- Kindern ist die Benutzung dieser Maschine zu untersagen und sie sind davon fernzuhalten.
- Ist der Aufkleber beschädigt, unleserlich oder nicht mehr vorhanden, muss er ersetzt werden.
- Ihre Hände, Füße und Haare von allen drehenden Teilen fernhalten.

AVVERTENZA

- Ogni uso improprio del presente articolo rischia di provocare gravi incidenti.
- Prima di qualsiasi utilizzo, vi preghiamo di leggere attentamente le istruzioni per l'uso e di rispettare le avvertenze e le modalità d'impiego.
- Tenere i bambini lontani dalla macchina e non permettere loro di utilizzarla.
- Se l'etichetta è danneggiata, illeggibile o assente, occorre sostituirla.
- Non avvicinare mani, piedi e capelli ai pezzi in movimento.

WAARSCHUWING

- Onjuist gebruik van dit product kan ernstige verwondingen veroorzaken.
- Voordat u het product gaat gebruiken, moet u de gebruiksaanwijzing lezen en alle waarschuwingen en instructies die hij bevat toepassen.
- Deze machine niet door kinderen laten gebruiken en niet in de buurt ervan laten komen.
- Als de sticker beschadigd, onleesbaar of afwezig is, moet hij vervangen worden.
- Uw handen, voeten of haar niet in de buurt van de bewegende delen brengen.

AVISO

- Qualquer utilização imprópria deste produto comporta o risco de causar danos graves.
- Antes de cada utilização, leia atentamente as instruções de utilização e respeite o conjunto dos avisos e instruções incluídas.
- Mantenha este aparelho afastado das crianças e não permita a sua utilização por estas.
- Se o autocolante estiver danificado, ilegível ou ausente, é conveniente substituí-lo.
- Não aproxime as suas mãos, pés e cabelos das peças em movimento.

UWAGA

- Nieprawidłowe użytkowanie produktu może być przyczyną wypadków.
- Przeczytaj instrukcję obsługi i przestrzegaj wszystkich zaleceń i instrukcji.
- Nie zezwalaj dzieciom na zabawę na i w pobliżu urządzenia.
- Wymień etykiety w przypadku uszkodzenia, nieczytelności lub ich braku.
- Nie zbliżaj rąk, nóg i włosów do elementów w ruchu.

FIGYELMEZTETÉS

- A szerkezet helytelen használata súlyos sérülésekhez vezethet.
- Használat előtt olvassa el a felhasználói kézikönyvet és tartson be minden figyelmeltetést, illetve használati útmutatót.
- Ne hagyja, hogy a gyerekek a gépre vagy közelébe kerüljenek.
- Cserélje ki a címkét, ha sérült, olvashatatlan vagy hiányzik.
- Tartsa távol a kezeket, lábakat, a haját a mozgó alkatrészekről.

Предупреждение

- Некорректная эксплуатация данного изделия может вызвать тяжелые поражения.
- Перед использованием внимательно прочитайте инструкцию по эксплуатации.
- Соблюдайте все предосторожности и рекомендации, которые содержит этот документ.
- Не позволяйте детям использовать эту машину. Не допускайте детей близко к аппарату.
- Если клейкая этикетка повреждена, стерта или отсутствует, ее необходимо заменить.
- Необходимо следить за тем, чтобы руки, ноги и волосы находились вдали от движущихся частей аппарата.

Προειδοποίηση

- Η ακατάλληλη χρήση του προϊόντος εγκυμονεί κίνδυνο σοβαρού τραυματισμού.
- Πριν από κάθε χρήση, διαβάστε προσεκτικά τις οδηγίες χρήσης και τηρείτε όλες τις προφυλάξεις και τις οδηγίες που περιέχουν.
- Μην επιτρέπετε τη χρήση του μηχανήματος από παιδιά και κρατήστε τα μακριά από αυτό.
- Εάν κάποιο αυτοκόλλητο έχει καταστραφεί, είναι δυσανάγνωστο ή λείπει, θα πρέπει να αντικατασταθεί.
- Μην πλησιάζετε τα χέρια, τα πόδια και τα μαλλιά σας σε κινητά εξαρτήματα.

ATENȚIE

- Utilizarea necorespunzătoare a acestui produs riscă să provoace răni grave.
- Înainte de utilizare, vă rugăm să citiți cu atenție modul de folosire și să respectați toate atenționările și instrucțiunile pe care acesta le conține.
- Nu permiteți copiilor să utilizeze această mașină și țineți-i departe de aceasta.
- Dacă autocollantul este deteriorat, ilizibil sau lipsește, este indicat să-l înlocuiți.
- Nu apropiați mâinile, picioarele și părul de piesele în mișcare.

UPOZORNENIE

- Akékoľvek nevhodné použitie tohoto výrobku môže vyvolať vážne poranenia.
- Pred akýmkoľvek použitím výrobku si starostlivo prečítajte návod na použitie a rešpektujte všetky upozornenia a pokyny, ktoré sú tu uvedené.
- Nedovoľte deťom, aby tento prístroj používali a približovali sa k nemu.
- V prípade, že je samolepiaci štítok poškodený, nečitateľný alebo štítok chýba na výrobku, je potrebné ho vymeniť.
- Nepribližujte ruky, nohy a vlasy k súčiastkam, ktoré sa pohybujú.

UPOZORNĚNÍ

- Jakékoliv nevhodné použití tohoto výrobku může způsobit vážná poranění.
- Před jakýmkoliv použitím výrobku si pečlivě pročtěte návod k použití a respektujte všechna upozornění a pokyny, která jsou zde uvedena.
- Zabraňte dětem, aby tento přístroj používaly a přibližovaly se k němu.
- Jestliže je samolepicí štítek poškozen, je nečitelný nebo na výrobku chybí, je nutné jej vyměnit.
- Nepřibližujte ruce, nohy a vlasy k pohybujícím se součástkám.

注意

- 滥用本产品有造成严重伤害的可能。
- 使用前请阅读使用说明，遵守其中的有关注意事项和操作规程。
- 不要让儿童使用本产品或在产品周围玩耍。
- 若标签受损、印刷模糊或无标签，则应更换标签。
- 使手、脚和头发远离运动的部位。

ENGLISH

You have chosen a piece of fitness equipment by DOMYOS. We thank you for your confidence in us.

We have created the DOMYOS brand to provide a way for all athletes to stay in shape.

This product has been designed by athletes for athletes. We would be pleased to receive your comments and suggestions concerning DOMYOS products. Therefore, your store team is ready to listen, as is the DOMYOS products design department.

You can also find us at www.domyos.com

We wish you successful training and hope that you will enjoy using this DOMYOS product.

PRESENTATION

The VE 570 is a new generation fitness machine.

This product features magnetic resistance for very comfortable, silent, smooth pedalling.

The VE 570 combines the circular movements of a bike, the horizontal movements of running and the vertical moves of a stepper.

The elliptical movements of your legs combined with arm movements exercise your: buttocks, quadriceps, calf and dorsal muscles, pectorals and biceps.

SAFETY

To reduce the risk of serious injury and damage to the product, read the following important instructions for safe usage before using the product.

1. Only use this product in the manner described in this manual. Keep this manual for the entire life of the product.
2. The owner is responsible for ensuring that all users of this product are properly informed as to how to use this product safely.
3. DOMYOS cannot be held liable for claims of injury or damage sustained by any person or property originating from the use or misuse of this product by the purchaser or by any other person.
4. This device complies with European standards (standard CE, standards EN-957-1 and EN 957-6 category HC) concerning fitness equipment in domestic, non-therapeutic use (equivalent to GB17498). Do not use this product in a commercial, rental or institutional setting.
5. Use the product indoors on a flat surface, in an uncluttered place free from moisture and dust. Ensure that you have enough space to safely access and move around the device. Do not store or use the product outside.
6. It is the user's responsibility to inspect and if necessary tighten all parts before using the product. Immediately replace any worn or defective parts.
7. Any assembly or disassembly of the product should be carried out with care.
8. Do not modify your product.
9. Should your product deteriorate, stop using it until it has been fully repaired and return it to your Décathlon store.
10. Do not store this product in a damp place (e.g. edge of a pool, bathroom, etc).
11. For its protection, cover the floor under the product with a suitable floor mat, available in Decathlon stores.
12. Never allow more than one person to use the product at any one time.
13. Keep your hands and feet away from moving parts.
14. Keep your back straight while exercising.
15. Put your hair up so that it does not get in the way during exercise.
16. Do not wear baggy clothing likely to get in your way during exercise.
17. Always hold the fixed handlebar when getting on or off the machine.
18. Keep children and pets away from the product at all times.
19. Use a soft cloth to remove dust. Persistent stains (like sweat) can be removed with a slightly damp cloth.
20. There are many factors that may affect the precision of the readout from the heart rate monitor; it is not a medical device. It is designed merely to help you determine your approximate heart rate.

WARNING:

21. People who use a pacemaker or any other implanted electronic device are warned that they use the heart rate monitor at their own risk. Before the first use, a test exercise under the supervision of a doctor is thus recommended.
22. Pregnant women are advised not to use the heart rate monitor. Before any use consult your doctor
23. As you finish your workout, gradually reduce your pedalling speed until the pedals come to a complete stop.

WARNING: If you experience vertigo, nausea, chest pains or any other abnormal symptom, stop exercising immediately and consult your doctor before continuing.

WARNING

This is especially important for people aged over 35 or those who have previously had health problems or have not done any sport for a number of years. Read all instructions before use.

MOVING YOUR PRODUCT

Warning: You need to get off the elliptical bike before moving it.

Stand facing the front of the bike, hold the handlebar and pull the bike towards you. Your bike now rests on the castors and you can move it. When you have finished moving it, hold on to it until the back feet are back on the ground.

ADJUSTMENTS

1 LEVELLING THE BIKE

Warning: You need to get off the elliptical bike before levelling it.

In the event that the product becomes unstable during use, turn one of the level correctors until it is stable again.

2 ADJUSTING THE RESISTANCE

According to EN definition, this product is a «speed independent product». You can adjust the braking torque not only through the pedalling frequency, but also by choosing the resistance level manually (by turning the torque controller button on non-motorized products, by pressing the up/down buttons on motorized products). Nevertheless, if you keep the same resistance level, the braking torque will increase/decrease as your pedalling frequency increases/decreases.

3 SETTING THE GRADIENT

You can set the gradient of your VE 570 by setting the height of the rear leg.

There are three preset positions:

Low position = 0 degrees

You make equal demands on your upper and lower body.

Intermediate position = 5 degrees

You make more demands on your upper body while also exercising your lower body.

High position = 10 degrees.

You make great demands on your upper body while also exercising your lower body.

To change the gradient of your bike:

- 1 - Lowering your bike
- 2 - Stand behind your bike.
- 3 - To adjust the height, unscrew and pull out the pin on the tube on the rear leg. Set the gradient and reinsert the pin in the rear tube, screwing it back in fully.

WARNING :

Ensure that you put the button back in place in the tube on the rear leg and screw it back in tightly.

Never exceed the maximum height of the rear leg tube.

4 SETTING PEDAL POSITION

Pedal position can be set during assembly.

There are three setting positions:

Forward: Closest to the handlebars

Central

Rear: Furthest from the handlebars

The optimal set position is the central position.

However, to meet performance objectives and to best adapt the bike to your body shape, setting the position will optimise your position on your elliptical bike.

The forward position is especially suited to people less than 1.75m tall, while the rear position is especially suited to people over 1.85m tall.

CONSOLE

THE KEYS ON YOUR CONSOLE

START/STOP

Starts and stops your exercise.

If you are in stop mode, a small crossed-out "P" flashes at the top left of the screen. To start your training session, press on START/STOP.

RESET

Resetting the console

MODE

For selecting functions and data

UP (+) / DOWN (-)

Increases / decreases an item or selects last / next choice criterion, or the target values

USING YOUR CONSOLE

1. STARTING

Plug the bicycle into the power outlet via the adaptor provided (DC 6V, 500mA). The electric connection is on the rear foot of the bike.

If the bicycle is already plugged in, press on any button or start pedaling.

2 . CHOOSING A USER PROFILE U1 - U4:

After starting, the screen displays **U1**, meaning that the profile selected is user 1.

The console thus offers the possibility of saving the data from individual workouts for 4 different users **U1-U4**.

E.g. time, distance, calories.

Choose your user profile with **UP/DOWN** and confirm your selection with **MODE**. The console will now save the parameters you have selected, so you won't have to reset the console when you start your next training session.

After inputting your user profile, the 4 training mode icons begin to flash at the top of the screen, at which point you can select your training mode.

3. SELECTING YOUR TRAINING MODE:

You can choose from 4 training modes:

MANUAL,
PROGRAM
USER,
TARGET H.R.

Which you select with the **UP/DOWN** keys, and confirm your choice with **MODE**.

MANUAL TRAINING: MANUAL MODE

The **MANUAL** mode allows you to manually control the intensity of your workout by increasing or decreasing the resistance level.

Braking resistance level:

This is represented by the flashing resistance bar. To choose the desired level of resistance, use the **UP/DOWN** keys. There are 8 levels of resistance between 1 and 8, 1 being the lowest and 8 the highest.

You can select and set several training objectives using **MODE** to select and **UP/DOWN** to set its target value:

Objectives:	
TIME :	Time in exercise minutes
DISTANCE :	Distance to cover
CALORIES :	Number of calories to be burned

It is a countdown, and the training session stops automatically when each of the objectives have been reached. The letter "**P**" symbolising "Pause" starts to flash in the top-left of the screen and a beep shows that it has stopped.

If the values are set to 0, they will increase during the workout and there will be no automatic stop.

After setting the desired resistance and your training objectives, start your training session by pressing **START/STOP**.

TRAINING BY PROGRAM: PROGRAM P1 - P6

Select this mode using **UP/DOWN** and confirm by pressing **MODE**.

This mode gives you access to the bicycle's 6 automatic programs. The symbols below the screen indicate the exercise profile of each program.

Once you have chosen **PROGRAM** mode, the first program, **P1**, is displayed on the screen. Use the **UP/DOWN** keys to select the program you want and confirm using **MODE**.

If you wish, you can adjust the resistance of the program, using **UP/DOWN** followed by **MODE**.

You can then set one or several objectives in the same way as in **MANUAL** mode described above.

Start your workout by pressing on **START/STOP**

If the program's pre-selected resistance is too low or too high, you can increase it manually at any time, without interrupting the workout, by using **UP/DOWN**

CUSTOMIZED PROGRAM: USER

The **USER** function allows you to create a program on your own that will be added to the 6 preset programs. Select **USER** mode using **UP/DOWN** and confirm by pressing **MODE**.

Next, choose the intensity of each of the segments of the programmed profile, using **UP/DOWN**, and proceed by pressing **UP/DOWN** twice when setting the following segment.

Complete your program profile in this way and begin your workout by pressing **START/STOP**.

You can then set one or several objectives in the same way as **MANUAL** mode described above

TARGET HEART RATE

Choose TARGET HR mode with **UP/DOWN** for a workout controlled by your target heart rate, and confirm by pressing **MODE**.

Next, enter your age using **UP/DOWN** and **MODE**.

You can increase this percentage to 75% or even 90%, or « **THR** » using **UP/DOWN**.

The **THR** function enables you to enter an individual heart rate expressed in beats / minute instead of a pre-selected percentage.

After you choose **THR** the console first offers a default frequency of 100 beats / minute in the lower right-hand corner of the screen. Use **MODE** and **UP/DOWN** to enter your desired value, between 30 and 240 beats per minute, then confirm the entry with **MODE**.

For a guideline for setting a heart rate goal, please refer to the chart below, which provides indicative values. Important: this is only an estimate, which in no case should be considered a medical certainty. Please note that before undertaking any sport it is necessary to consult a doctor!

You can then choose an additional goal such as TIME, DISTANCE, etc. using **MODE** or start your program using **START/STOP**.

The resistance decreases automatically by one level every 15 seconds if your heart rate is too high. If it is too low the resistance increases by one level every 30 seconds, until level 16 is reached.

Please note:

You have to keep both hands correctly positioned on the heartbeat sensors.

You cannot adjust the resistance of the bicycle manually in **THR** mode.

You can stop the workout immediately in any training mode, by pressing on **START/STOP**.

EXPLANATION OF SCREEN INDICATIONS

SCAN :

During the workout, the console will regularly switch between speed, displayed in Km/h/miles "SPEED" and revolutions per minute "RPM".

SPEED :

Indicates your speed between 0.0 et 99.9 Km/h or miles/h.

RPM :

Indicates the number of rotations per minute of the pedals.

TIME :

Indicates the duration of your workout, or a countdown of the pre-selected valued between 01:00 and 99:00 minutes.

DISTANCE :

Indicates the distance covered, from 0.1 Km or miles and 99.90 Km or miles.

If a target distance is pre-selected, it will be counted down to 0.00.

CALORIES :

Approximate indication of calories burned, between 0 and 999, or countdown of the pre-selected value.

PULSE :

Indicates your heart rate as soon as you grasp the heartbeat sensors of the handlebars "HANDPULSES".

Important: this is only an estimate, which in no case should be considered a medical certainty.

The bike console will turn off automatically after 5 minutes of non-use. All the training objectives (time, distance, calories etc.) will be saved and will reappear when the console is turned back on.

TROUBLESHOOTING

- If the heart rate indicator is not flashing or is flashing erratically, check that your hands are positioned properly and that the sensors are not too moist
- If the counter does not turn on:
Check the condition and the connections of the cables on the back of the console, and where the stem meets the main frame of the bike. Also check that the adaptor is correctly connected to the product and your electrical circuitry
- If the problem persists
Bring the product back to the nearest DECATHLON store

ENGLISH

CARDIO-TRAINING

CARDIO TRAINING

Cardio training is aerobic exercise (muscle development in the presence of oxygen); it enables you to improve your cardiovascular capacity. More specifically, you improve the tone of your heart muscle and blood vessels. Cardio training provides oxygen from the air you breathe to your muscles. The heart pumps this oxygen throughout the entire body, and especially to the muscles that are doing the work.

CHECKING YOUR PULSE

It is essential that you check your pulse regularly during exercise in order to monitor your training.

If you have no electronic measuring device, proceed as follows:

To check your pulse, place two fingers:

- on your neck, below your ear or under your wrist next to your thumb

Do not press too hard:

excessive pressure reduces your blood flow and may slow down your heart rate.

After counting the beats for 30 seconds, multiply by two to give the number of beats per minute.

For example: 75 beats counted equals 150 beats per minute.

PHASES OF PHYSICAL ACTIVITY

A - Warm-up phase

The warm-up is the preparatory phase for exercise and gets your body FULLY READY to start working out. It is a way to PREVENT INJURIES TO TENDONS AND MUSCLES. It involves two steps: WAKING UP THE MUSCULAR SYSTEM, AND OVERALL WARM-UP.

1) You wake up your muscles with a SERIES OF SPECIFIC STRETCHES that PREPARE YOU FOR EXERCISE: every muscle group is used, and the joints are stimulated.

2) The overall warm-up makes it possible to put the cardio-vascular and respiratory system into action progressively, for a better blood supply to the muscles and better preparation for the effort. It should be long enough: 10 minutes for a recreational sport, and 20 minutes for a competitive sport.

Note that you should warm up for longer: in the morning and if you are over 55.

B - Training

The workout is the main phase of your physical activity.

By working out on a REGULAR basis, you can improve your physical fitness.

- Anaerobic work, for improving endurance.
- Aerobic work for improving cardio-pulmonary strength.

C - Warming down

This corresponds to low-level activity; it is the progressive "resting" phase. WARMING DOWN brings your cardiovascular, respiratory and circulatory systems and your muscles back to normal functioning (thereby preventing undesirable side effects such as the build-up of lactic acid, which is one of the major causes of muscle pain namely, cramps and stiffness).

D - Stretching

You should stretch after warming down.

Stretching after exertion: Minimises MUSCULAR STIFFNESS caused by the build-up of LACTIC ACIDS and "stimulates" BLOOD CIRCULATION

PARTS OF THE BODY EXERCISED

The elliptical bike is an excellent form of cardio-training. Training on this apparatus will increase your cardiovascular capacity, thereby improving your physical fitness and your endurance. You will also burn calories (a necessary step in losing weight, in conjunction with a diet). The elliptical trainer also helps you to tone your legs, buttocks and upper body (chest, back and arms). The calf muscles and lower abdominals are also exercised. You can consolidate work on your buttocks by pedalling backwards.

USE

If you are just starting out, begin by exercising for several days at a low resistance and speed, without forcing it, taking breaks if necessary. Gradually increase the number or duration of the sessions.

Maintenance/Warm-up: Gradual effort starting with 10 minutes.

For maintenance work designed to keep you in shape or get back into shape, you can train every day for about ten minutes. This type of exercise will wake up your muscles and joints, or it can be used as a warm-up before another type of physical activity. To develop muscle tone in the legs, choose a greater resistance and increase the duration of the exercise. Obviously, you can vary the pedalling resistance over the course of your workout.

Aerobic exercise for getting into shape: Moderate effort for a relatively long time (30 minutes to 1 hour).

If you wish to lose weight, this type of exercise, combined with a diet, is the only way to increase the amount of energy your body consumes.

To do this, it is useless pushing yourself beyond your limits.

Training on a regular basis is what will produce the best results.

Choose a relatively low pedalling resistance and exercise for at least 30 minutes.

This exercise should cause you to build up a mild sweat, but it certainly should not leave you out of breath.

It is the duration of the exercise at a slow pace that will cause your body to dip into your fat reserves to get its energy, as long as you pedal for more than about thirty minutes at least three times a week.

Aerobic training for endurance: Sustained effort for 20 to 40 minutes.

This type of training aims to strengthen the heart muscles significantly and improve respiratory functioning.

Pedalling resistance and/or speed is increased to accelerate respiration during exercise.

This type of exercise is more sustained than when you are working out to get into shape.

Little by little, as you train, you will be able to work out for longer, at a faster pace or with a higher resistance.

Aerobic endurance training requires at least three training sessions per week.

More intense workouts (anaerobic work and red-zone work) are reserved for athletes and require specific preparation.

After each session, spend several minutes pedalling, gradually reducing speed and resistance to warm down and gradually return the body to rest.

CARDIO-TRAINING : EXERCISE ZONE

- Training at 80 to 90% and above of maximum heart rate: Anaerobic zone and red zone reserved for high-performance athletes and specialists.
- Training at 70-80% of maximum heart rate: Endurance training
- Training at 60% to 70% of maximum heart rate: Getting into shape/burning off fat.
- Training at 50 to 60% of maximum heart rate.

NOTICE AND WARNING TO USERS

Getting into shape must be done in a CONTROLLED manner. Before beginning physical activity, do not hesitate to CONSULT a PHYSICIAN, especially if: you have not done any sport in recent years, you are over the age of 35, you are unsure of your health or if you are on medication. **IT IS ESSENTIAL TO CONSULT A DOCTOR BEFORE PRACTISING A SPORT.**

MEDICAL WARNING

Warning: Heartbeat measurements always start at 90 beats per minute and require a stabilisation period (around 30 seconds). When exercising, the time needed to calculate heartbeats per minute means there is a delay of around 20 seconds between the real and displayed heart rates.

The information displayed on your console is for information purposes and has no scientific value. The numerical values are likely to vary depending on your palm position and the pressure exerted on the heart rate sensors. If your hands are not in full contact with the heart rate sensors, measurements will be affected. This device is not designed to be used for a medical diagnosis or to prevent cardiac problems. Consult a doctor before starting any training programme, especially if you have been inactive for a long period, have had heart problems, smoke, suffer from high blood pressure and/or are overweight. If you use a pacemaker or a cardiac stimulator, do not use the heart monitor before consulting a doctor.

WARRANTY

DECATHLON guarantees the materials and workmanship of this product under normal conditions of use for 5 years for the structure and 2 years for parts subject to wear and tear and for workmanship, starting at the date of purchase as indicated by the date on the till receipt. DECATHLON'S obligation with regard to this guarantee is limited to the replacement or repair of the product, at the discretion of DECATHLON.

All products for which the warranty is applicable must be received by DECATHLON at one of its approved facilities, delivery prepaid, accompanied by adequate proof of purchase.

This warranty does not apply to cases of:

- Damage caused during transport
- Improper or abnormal use
- Poor assembly
- Poor maintenance
- Repairs carried out by technicians not approved by DECATHLON
- Use for commercial purposes

This warranty does not exclude any legal guarantees applicable according to country and/or province
